

Installing and Configuring Bria

- Download the Bria
 - http://www.cypresscom.net/downloads/Bria_Win32_2054ah_58286.exe
- Run the Bria setup executable file and follow the prompts in the install wizard.
- After the installation is complete, run Bria (**Start > Programs > Cypress Communications > Bria**)
- When prompted, enter your Bria license.

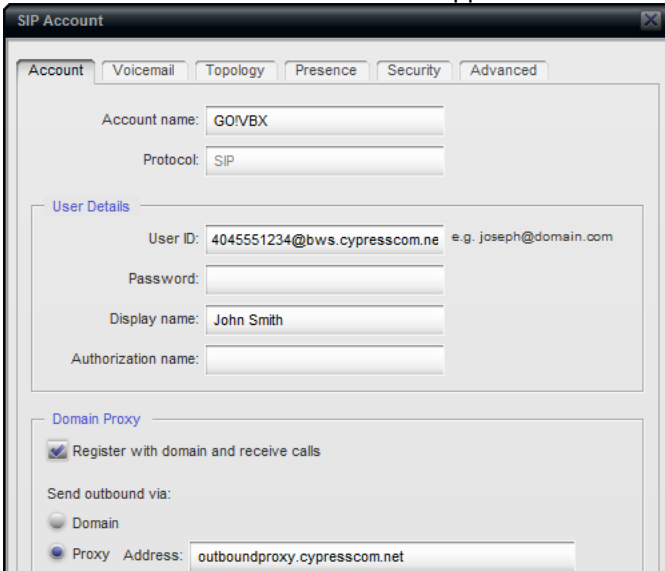

Setting up Accounts

You must set up a SIP account to make phone calls.

1. From the Bria menu, choose **File > Account Settings**. The Account Settings window appears.

2. Click **Add**. The SIP Account window appears.

3. In the Account tab, complete the User Details area with the following information:
 - **Account Name:** Name you want this account to be called
 - **User Details:**
 - i. **User ID:** *Your Number@bws.cypresscom.net* (Example: 4045551234@bws.cypresscom.net)
 - ii. **Password:** *Listed on your User Information Card as Password/Authorization Name*
 - iii. **Display Name:** *Input your name*
 - iv. **Authorization name:** *Listed on your User Information Card as Password/Authorization Name*
 - **Domain Proxy:**
 - i. **Register with domain and receive calls:** Check
 - ii. **Send outbound via:** Proxy Address: *outboundproxy.cypresscom.net*
4. Click **OK** in the SIP Account window.
5. On the Account Settings window, click **Apply** to register the newly added account.
6. The LCD screen on the phone should display a message indicating that it is “Registering Account” with the configured service. If all is well then you will see the message “Enter name or number”. You can now make calls with your new phone.
