Cypress Communications—the Premier Provider of Hosted VoIP Communications—Dances with Tango Networks for Fixed to Mobile Convergence Trial

With a single phone number for both office and mobile phones, Cypress Communications' customers will soon be able to benefit from the productivity and accessibility tools of unified communications no matter where they roam.

Atlanta and Richardson, Texas, January 17, 2008 – Cypress Communications, a leader in [hosted VoIP](#) solutions, today announced a trial of the Tango Networks [fixed to mobile convergence](#) solution, Abrazo™. By adding [fixed to mobile convergence](#) capabilities to its [hosted VoIP](#) solution—marketed as [C4 IP](#)™—Cypress Communications will enable its customers to access C4 IP's advanced calling features and money-saving corporate dialing plans using a single phone number and voice mailbox.

“Increased mobility and accessibility are emerging as top priorities for many small- to mid-sized firms, and we are confident that the integration of our [hosted VoIP solution](#) with Tango's fixed to mobile technology will help drive productivity for our customers and enhance their overall communications experience,” said Frank Grillo, executive vice president of marketing at Cypress Communications.

“With [fixed to mobile convergence](#), the mobile phone becomes an extension of a company's business communications infrastructure,” stated Al Leo, vice president of sales and business development for [Tango Networks](#). “By adding mobility to its solution, [Cypress Communications](#) is providing its customers the means to be even more productive, more accessible and more competitive than ever before.”

“Firms, especially those in the professional services arena, rely heavily upon mobile communications but have struggled with the ability to meet strict compliance and billing policies when cell phones are used. The Tango-Cypress fixed to mobile trial is the first step toward offering our customers the freedom of mobility and ease of use of unified accessibility—all while meeting regulatory compliance with full [business continuity](#) and back office record keeping—making Abrazo a perfect companion to our C4 IP solution,” added Grillo.

C4 IP from Cypress Communications is already recognized as one of the most robust [hosted VoIP](#) solutions available for small- to mid-sized enterprises. [C4 IP](#) features integrated access of voice and data, desktop phones, soft phones, local and long-distance voice services, voicemail, advanced [collaboration tools](#) and [remote office](#) functionality. From their computers, users can take advantage of productivity-enhancing applications and advanced features such as a [real-time presence](#), [desktop video](#), [unified messaging](#), [chat](#), [file sharing](#) and [Outlook](#) Integration.

About Tango Networks

[Tango Networks](#) integrates mobile phones into the corporate enterprise, enabling any mobile phone to become a true, seamless PBX extension on the enterprise network. With Tango Abrazo™, enterprises benefit from management and control over mobile service while enabling employees to be more responsive to business needs by providing advanced desk phone capabilities on any mobile device. Two phones. One solution. That's Tango. For more information, dance over to <http://www.tango-networks.com>.

About Cypress Communications

Boasting a 20-year legacy and more than 6,500 customers coast-to-coast, [Cypress Communications](#) provides [Communications as a Service](#) (CaaS) to small- and mid-sized enterprises. CaaS goes beyond traditional hosted VoIP offerings by delivering a fully managed unified communications solution. Comprehensive and flexible, the [CaaS](#) solution from Cypress includes integrated voice and data access, desktop phones, soft phones, local and long-distance voice services, voicemail, advanced collaboration tools and remote office functionality. From their computers, users can take advantage of productivity-enhancing applications such as [real-time presence](#), [desktop video](#), [unified messaging](#), [chat](#), [file sharing](#), and [Outlook integration](#). As a Deloitte Fast 50 and Fast 500 award recipient, Cypress Communications is also recognized as one of the fastest growing telecommunication companies in North America. Cypress is headquartered in Atlanta. The company's Web address is www.cypresscom.net.
