Alpharetta, GA-based Ashworth & Sullivan Wealth Management Group, a provider of estate planning, wealth management, and retirement strategies to high net worth clients and small- to medium-sized business owners in north Georgia and 15 states throughout the region, today announced that it has selected C4 IPTM from Cypress Communications for hosted VoIP and unified communications.

"We needed a communications solution that would reinforce our professional image as well as help us provide great service to our clients, and we found the perfect solution with C4 IP," said Casey Sullivan, managing partner at Ashworth & Sullivan. "With C4 IP's unified messaging and call routing features, we'll always be within reach of the people and information we need the most."

C4 IP provides voice and data access, desktop phones, soft phones, unified messaging and multimedia applications such as Microsoft Outlook integration, collaboration, real-time presence, chat, as well as audio, video and Web conferencing. Cypress' unified messaging feature lets users receive voicemails in their Microsoft Outlook inbox, listen to messages on their computer, phone or mobile device, and forward or save messages.
